Discover the gentle giants of South Ari

Nova is located in South Ari Atoll and is a scuba diver's ultimate playground. The region is widely known for its spectacular diving sites and congregations of large pelagics like the ever-graceful manta rays and whale sharks – the quintessential bucket list experience! There are a few destinations in the world where in-season whale shark sightings are guaranteed; lucky enough, our soul place happens to be one of them.

South Ari Atoll favours thilas (pinnacles) and channels rather than protected walls or coral reefs – a plethora of colourful fish, graceful eagle rays, various types of sharks, and more await. The thilas are covered in black coral bushes and have caves and overhangs that house some incredible residents – from grey reef sharks to thousands of blueline snappers. The region also features some impressive wrecks you can explore!

Contribute to conserve

The azure waters surrounding Nova are home to scores of colourful coral reefs and marine critters – some of the most remarkable sights you'll come across when you're in the Maldives. The coral reefs possess one of the most diverse ecosystems in the world, but they've come under threat due to climate change. At Nova, we coexist with the environment and try to minimise our impact on our surroundings as much as possible. Give back to nature - contribute and conserve!

CORAL FRAME SPONSORSHIP

Do your bit for the environment by taking part in Nova's Coral Frame Sponsorship Programme. Plant your coral in the Nova coral garden. Once you sponsor a coral frame, the Aquaholics team will send you online updates so you can follow the growth of your coral frame in real-time. Updates will be posted bi-annually. Plant your coral frame around the reef and help preserve and conserve the natural wonders surrounding our soul place today!
