

Six Senses Southern Dunes, The Red Sea

Six Senses Southern Dunes, The Red Sea is one of two inland locations that, together with coastal and marine initiatives, form The Red Sea Development Project on Saudi Arabia's west coast. Here, you will discover the essence of Saudi hospitality and explore the diversity of the Islamic heritage and culture, set to dramatic landscapes including volcanic craters, vast mountain ranges, desert dunes, and archeological jewels.

Every corner of the property reflects an artistic expression inspired by our Bedouin heritage. Our dining experiences combine the region's rich culinary culture with freshly grown ingredients. Our wellness offerings incorporate local healing traditions enhanced by innovation and the latest technology. From cultural exploration in the nearby village to adventure activities in the desert, our handpicked experiences will immerse you deep into the beauty of the region.

The resort is in the region of Tabuk, where there is a plan to open The Red Sea International Airport during 2023. By setting new standards in sustainability, we are helping to write the next chapter in the region's story, to show to the world that development can serve to preserve and enhance one of the most alluring secrets of the mystic Saudi Arabia.
